SKILLS

Web Development
JavaScript ES6, Vue.js, React.js,
HTML5, CSS3, Storybook.js,
Node.js

Testing
Jest, Vue-Test-Utils

Programming
Python, C

Databases
Firebase, MySQL/SQLAlchemy

EXPERIENCE

Zume, Inc.
Restaurant and Delivery Tech - San Francisco, CA   **MAR. 2019-Present**

- Developed Zume Component Library (ZCL), a collection of responsive, accessible, atomic UI components built with Vue.js and Typescript

- Hosted weekly syncs with external teams to identify component feature gaps and provide implementation support

- Authored extensive component interaction and implementation documentation with Storybook.

- Engineered Zume Management Console (ZMC), a fully responsive, accessible dashboard providing customer access to platform cloud services under a unified, immersive user experience.

- Executed interaction, design, and technical reviews for external teams to ensure consistency across ZMC application.

- Documented architectural decisions that served as guidelines for other developers contributing to the ZMC platform to standardize development practices.

- Maintained minimum 95% test coverage on all applications

- Researched headless and non-headless e-commerce solutions for building marketplace software to source and sell sustainable packaging

EDUCATION

UNIVERSITY OF CALIFORNIA, SANTA BARBARA   **JAN. 2012 - MAY 2016**
